

Render Texture Paint Supplies Quarterly Newsletter

As you know from our last Newsletter we mentioned we were in the process of acquiring some new products and business methods. so over the next couple of months we will be introducing a number of new products.

The first we are excited to announce is the Panel +Plus which you can read more about under the new products section.

Stay tuned for more product Releases as they come online.

We will update our website over the next few weeks to incorporate Panel +Plus but until then please don't hesitate to contact your rep or the office on 02 9896 8111

FOR ALL YOU PAINTERS

ECOSTYLE Paint PRICE REDUCTION!!

As you are aware Rockcote have released their Environmentally Friendly Internal Paints - **ECOSTYLE**. Due to its popularity we are now happy to be able to offer you a reduction in price. Please speak to your rep for updated pricing.

Remember, when you make a building more energy efficient you tend to close the building envelope more tightly which can cause problems with indoor air quality particularly in new buildings. CSIRO reports state that 70% of the Volatile Organic Compounds (VOC's) come from paint. Rockcote Ecostyle contains no VOC's and so is much safer to use in all indoor applications.

- All EcoStyle paints have Sensitive Choice Approval by The Asthma Council of Australia for interior & exterior use and are classed as Zero VOC. This gives Ecostyle paints the edge over other commercially available products which are only classified as Zero VOC when used untinted.
- All Ecostyle paints are certified under the Australian Ecolabelling Program (Good Environmental Choice Australia) "GREENSTAR"

NEW PRODUCTS

PANEL +PLUS

This new Fire Retardant, External Lightweight Cladding is we believe the ants pants of polystyrene sheets.

There are many benefits to the New Panel +Plus

- **Panel Plus** is a 75mm M-Grade EPS Panel which has a cut sawtooth flute on the front for **correct thickness of render applications and mesh position.**
- **Panel Plus** also has a cut sawtooth flute on the rear of the panel to construct an air gap between building paper and panel to **allow for condensation/water runoff.**
- **Panel Plus** can be **joined off stud** enabling less waste
- **Panel Plus** has a **Thermal Rating of R2-1**
